MICROGRAVITY

Independent Micro Spring Technology

MICROGRAVITY supports the body at every point through independently pocketed micro springs. Thanks to its high point elasticity, it reduces pressure points and delivers superior comfort and balanced spinal support by perfectly adapting to the body's natural contours. Its silent structure and effective motion isolation ensure an uninterrupted sleep experience.

With top and bottom fabric bonding or center-bonded production options, MICROGRAVITY offers efficiency and flexibility in manufacturing. Featuring an optional lamella frame and a spring count of up to 880 springs per m², it delivers maximum micro-level support and premium performance.
