

Mini Pocket Spring

Mini Pocket Spring

Mini Pocket Spring Technology delivers a new level of comfort and performance for mattresses, pillows, and furniture applications. Designed with a compact, low-profile structure, it seamlessly integrates into thin and hybrid designs—giving you greater flexibility without compromising comfort. Its individually responsive spring system adapts to every movement, evenly distributing body pressure while significantly reducing motion transfer. The result is a more stable, undisturbed, and luxurious sleep experience.

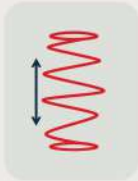

With a high spring density, it provides targeted spinal support and enhanced ergonomic comfort—especially in the head and neck areas—helping users wake up refreshed and well-rested.

The breathable design promotes superior airflow, ensuring a cooler, fresher, and more hygienic sleeping environment.

Mini Pocket Spring is the smart choice for those who want to elevate comfort without adding extra weight—offering a versatile, high-performance solution for modern bedding and furniture designs.
