## MULTIZONE

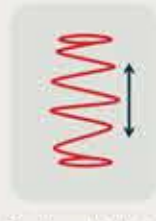

### Smart Zoned Support Technology

MULTIZONE is an advanced spring technology developed by positioning springs with different firmness levels within the same pocket unit, precisely aligned with the body's specific support requirements. Softer springs are used in the neck, lumbar, and knee areas, while springs with higher load-bearing capacity are applied in the shoulder, back, and hip zones to achieve an ideal balance between comfort and support.

This intelligent structure helps maintain the spine's natural alignment, supports muscle relaxation, and minimizes localized pressure. Thanks to its flexible design, MULTIZONE can be combined with different spring technologies or integrated into various spring systems, elevating ergonomics to a superior level in premium mattress designs.

Spring Diameter  
37-81 mm

## MultiZone Pocket Spring Unit Production

Quality Standard	TS-7167
Pocket Spring Diameter Ø	37-81 mm
Pocket Unit Height	80-250 mm
Pocket Unit Wire Diameter Ø	1,20 mm-2,30 mm
Number of Springs per m <sup>2</sup>	160-850 pcs
Pocket Unit Spin Count	4-10 Spin
Pocket Unit Frame Specifications	<ul style="list-style-type: none"> <li>• Standard 10 × 1.4 mm lamet frame</li> <li>• Circular frame can be produced in the desired diameter</li> <li>• Zoned frame configuration available</li> <li>• Frameless production option available</li> </ul>
Pocket Unit Packaging	Roll-packed with paper wrapping or compressed
Maximum Unit Width	Up to 200 cm
Unit Length	Can be produced in the desired length
Arrangement	Flat and nested arrangements can be applied together or separately
Production Type	Units can be produced width-to-width
Zone Type	Can be produced with the desired number and sequence of zones
Bonding Type	Center bonding, top & bottom fabric bonding, or both

With MULTIZONE, springs of varying firmness provide precisely the required level of support to the body's five distinct zones.
